

Recycled & Reuse

©Luke R Davies 2011

There's a mountain of waste even junk in outer space
It's a throw away society
Old computers and TV's are just part of the disease
Shopping seems to be a way of life

Don't buy a new big screen cause there is nothing to be seen
Go out, don't the world pass you buy
That \$20 drill it will be soon in land fill
There's got to be a better way

Use it up, wear it out, make it do or do with out
Recycle and reuse
Nothings made to last like the good old days of past
It's throw it out and buy something new.

People use to walk now they drive and never talk
To the folks they meet along the way
They don't exercise and it's really no surprise
They don't believe in climate change.

Yes plastic here to stay because it never goes away
You can't see it but it will always be their.
It pollutes the land and sea and it's up to you and me
Yes the planet needs a helping hand.

Use it up, wear it out, make it do or do with out
Recycle and reuse
Nothings made to last like the good old days of past
It's throw it out and buy something new.

Use it up, wear it out, make it do or do with out
Recycle and reuse
Nothings made to last like the good old days of past
It's throw it out and buy something new.
